EXUDERM® SATIN
Hydrocolloid Dressing

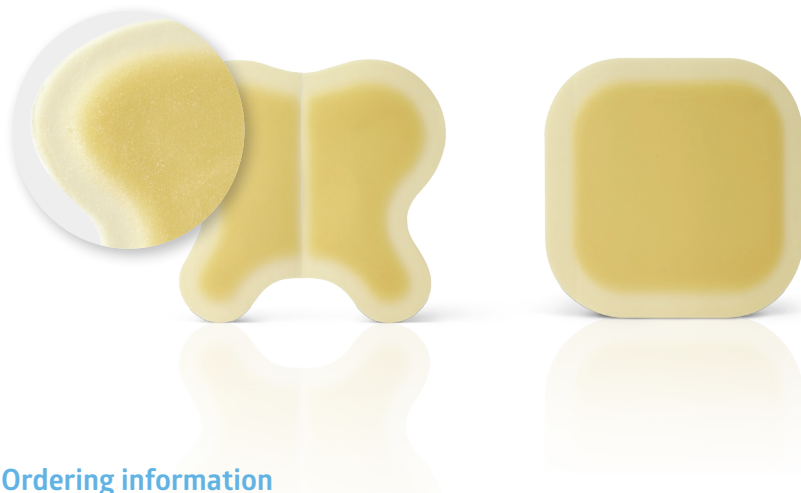

EXUDERM® SATIN

ALL THE FEATURES YOU EXPECT

Exuderm Satin is a good choice for wounds with light to moderate drainage. It provides a protective, occlusive barrier that facilitates granulation and epithelialization.

Features

- Low profile, tapered edge
- Helps maintain a moist wound healing environment
- Smooth, satin backing is low friction for longer wear
- Provides a protective, translucent barrier allowing for wound observation
- 7-day wear time, depending on amount of drainage

Indications

- Pressure ulcers
- Partial and full thickness wounds
- Leg ulcers
- Donor sites
- Wounds with light to moderate drainage
- Lacerations and abrasions
- First and second degree burns

Contraindications

- Third degree burns
