

Falls Intervention and Risk Management

Product Catalogue and Programme

Elevate patient safety.

Help reduce falls with targeted solutions.

Some patients are at risk of falling. The challenge is identifying at-risk patients and keeping them safe, and on their feet. Medline has developed a solution for just that and offers a wide spectrum of **quality products and a unique falls management programme** to help drive best practices and reduce patient falls.

Strengthen your falls management with smart solutions designed to help elevate patient safety and improve patient care. From falls risk recognition to safety essentials, we have everything you need to empower your team.

And your bottom line.

Fight falls to protect your patients ...

35,848

Is the number of falls-related deaths in the EU per year (people aged 65 and older).¹

Falls are more common than both strokes and heart attacks, and their consequences can be just as serious.²

83% of all inpatient falls in the UK occur in acute-care settings.³

65+

77% of all inpatient falls occur with patients 65 years or older.⁴

13,800 hip-fracture-related deaths occur per year in the UK.⁵

10% of patients who suffer a hip fracture will die within one month. 30% will die within a year.⁶

¹Falls among Older Adults in the EU-28: Key Facts from the Available Statistics, report, EuroSafe, www.eurosafe.eu.com/uploads/inline-files/POLICY_BRIEFING_20_Facts_on_falls_in_older_adults_in_EU.pdf. ²Active Ageing through Preventing Falls: 'Falls Prevention Is Everyone's Business' - Joint Declaration, report, 2015, www.eunaapa.org/wp-content/uploads/2015/09/Joint-Declaration_Sept-2015.pdf. ³The Incidence and Costs of Inpatient Falls in Hospitals July 2017, report, NHS Improvement, https://improvement.nhs.uk/documents/1471/Falls_report_July2017.v2.pdf. ⁴ibid. ⁵Facts about Falls, 'Profound', <http://profound.eu.com/wp-content/uploads/2014/01/AgeUK-ID201144-Falls-Awareness-Facts-About-Falls-FINAL.pdf>. ⁶Hip Fracture in Adults NICE Quality Standard, National Institute for Health Care Excellence, <https://www.nice.org.uk/guidance/QS16/documents/draft-quality-standard>.

... and your bottom line.

€25 billion
Estimated financial impact on the EU as a result of falls⁷

£2.3 billion
Cost of falls to the NHS per year⁹

£3.9 million
Estimated cost of falls for an 800-bed acute-care hospital¹⁰

Patients over 65 who suffer falls
87% of total medical costs in the UK¹¹

25%
Potential reduction of falls costs by implementing falls prevention protocols and interventions

€9,370
Estimated cost per falls case in the Netherlands⁸

€14,600
Estimated cost per falls case in the Netherlands in the 85+ age group

€1.5 – 2.3 billion
Cost of falls in France per year¹²

Fight falls with our proven products and powerful programme.

Our Stand FIRM programme

Are you doing everything you can to protect your patients? The right products are critical to falls protection. But it's a complex issue that also demands additional support. That's why we've developed **Stand FIRM (Falls Intervention and Risk Management)**.

Products

Medline Europe currently offers a selective portfolio of products designed to address specific risk factors for falls. In collaboration with our customers, we are continually assessing and evaluating meaningful products to add to our existing offering.

Beyond products

Medline Europe is a committed partner in helping our customers prevent falls and reduce injuries from falls by providing practical tools and facilitating the sharing of best practices amongst clinicians.

Q&A

Q. Why aren't falls products enough to help protect patients from falls?

A. Products are a complement to the foundation of any falls management programme. They are essential in creating a strong clinical programme that has been proven to help keep patients safe.

Q. We already have a falls management programme. Why change?

A. Stand FIRM was designed to complement and work alongside your existing programme. We want to empower your staff with meaningful products and practical tools in order to provide the highest level of falls management care and create lasting change.

Q. How does Medline continue to support us with Stand FIRM?

A. Stand FIRM is meant to be a long-term collaboration between your facility and Medline. We are continually working to enhance our product offering, collect relevant knowledge and facilitate the sharing of best practices.

'Falls prevention must have a multifocal approach and not be communicated as another task to be done; instead, it needs to be communicated as a fundamental principle of patient care.'

— Martie Moore, Medline Chief Nursing Officer

Visual cueing in falls management

Preventing falls is everyone's responsibility, but how can your staff participate in the fight against falls without knowing whom they should be looking out for?

Through visual cueing, nurses, healthcare assistants, porters, housekeepers and catering staff can all play an important role in reducing the number of patient falls.

As yellow is the most commonly used colour for identifying high-risk patients, Medline has developed an exclusive range of yellow falls prevention products to help you easily introduce visual cueing at your hospital.

Look for this icon throughout the catalogue as it indicates that a product is designed for use within a visual cueing protocol.

Ask your account manager for more information about how the Stand FIRM programme makes it easy for you to implement visual cueing.

Footwear

With their soft material and slip-resistant grippers, Medline slipper socks provide the perfect balance between comfort, stability and savings.

Medline slipper socks are a simple intervention to help reduce the risk of falls.

Double-Tread Slipper Socks

Twofold traction and warmth

Ensure your patients have a pleasant hospital stay and are secure on their feet with our Double-Tread Slipper Socks.

- » **Double the tread** – The slip-resistant tread fused to the top and bottom provides a continuous grip for extra protection against falls.
- » **Twice the appeal** – The absorbent terry cloth interior helps keep feet dry and comfortable.
- » **Generous sizing** – A wide range of colour-coded sizes promotes easy identification, including a longer and wider bariatric size and two one-size-fits-most options.
- » **PPE certified** – Our small to one-size-fits-most slipper socks are PPE certified per the PPE regulation (EU) 2016/425.

Single-Tread Slipper Socks

Performance and savings

Enhance patient care while containing costs with our popular Single-Tread Slipper Socks.

- » **Slip-resistant tread** – The gripper treads fused to the sole provide traction to help prevent slips and falls.
- » **Economical comfort** – The soft terry cloth interior is cosy and absorbs perspiration.
- » **Colour-coded sizes** – A broad range of colour-coded sizes allows for easy identification, including a convenient one-size-fits-most option and two paediatric sizes.
- » **PPE certified** – Our small to one-size-fits-most slipper socks are PPE certified per the PPE regulation (EU) 2016/425.

Falls Prevention Slipper Socks

Clear identification of at-risk patients

Our brightly coloured Falls Prevention Slipper Socks help discreetly alert staff about patients who are at risk for falls or who require extra care.

- » **Double-sided grippers** – The slip-resistant tread fused to the top and bottom provides a continuous grip for extra protection against falls.
- » **Easy comfort** – The terry cloth interior helps feet stay dry and warm.
- » **Clearly sized** – Sizing is indicated on the slipper’s sole for easy identification by staff.
- » **PPE certified** – Our medium to X-large slipper socks are PPE certified per the PPE regulation (EU) 2016/425.

Care Essentials

Enhance care and increase awareness of high-risk patients with these essentials.

Patient KareBag

Keep a patient's comfort items right at his or her bedside without adding clutter. Simply attach the KareBag to a patient's bed, walker or wheelchair to create a neater environment with everything safely within reach.

- » Discreetly identify patients who are at risk of falling with the bag's yellow colour.
- » Improve the patient's experience.
- » Eliminate the need for patients to overreach, helping reduce the risk of falls.
- » Help minimise lost personal items, like glasses, dentures and hearing aids.

SKU	Description	Size	Packaging
KAREBAG01	Patient Bedside Organiser	33 x 27 x 14 cm	10 bags/case

Falls Prevention Kit

Our yellow Falls Prevention Kit provides you with the essentials to effectively identify high-risk falls patients, all in one place.

- » **Yellow slipper socks** – Our most popular yellow slipper socks with a double tread help keep patients on their feet.
- » **Cosy blanket** – The yellow blanket offers patients additional warmth, all while indicating their falls risk status to hospital staff.
- » **Discreet, yet effective** – This exclusive Falls Prevention Kit provides a quick and easy way to implement a visual cueing protocol in your hospital without overtly labelling a patient as a falls risk.
- » **PPE certified** – Our slipper socks are PPE certified per the PPE regulation (EU) 2016/425.

Alarm Monitor

Set the tone for fast responses.

For patients assessed as having a high falls risk, Medline's patient alarms are a simple and low cost intervention, available with a two-year warranty.

- » **Alerting staff and keeping patients safe:** Auto-sensing technology monitors patient movement and triggers the alarm.
- » **Compatibility:** The alarm monitor is compatible with most corded sensor pads and nurse call systems.
- » **Customisable settings:** Set the desired volume and time delay based on patient and staff needs.

SKU	Description	Size	Packaging
ALARM01	Falls Prevention Alarm Monitor, wired	8.5 x 13 cm	1 ea/box

Sensor Pads

- » When this weight-sensitive pad is connected to a monitor unit, it activates an alarm if the patient leaves a chair or bed.
- » The durable, high-grade vinyl pad is easy to store.
- » It is intended for single-patient use on a chair or bed (underneath the fitted sheet).

SKU	Description	Size	Packaging
SENPAD01	Chair Sensor Pad, wired, single-patient use	25.4 x 38.1 cm	5 ea/box
SENPAD02	Bed Sensor Pad, wired, single-patient use	25.4 x 76.2 cm	5 ea/box

Patient Falls Alarms

Let our patient falls alarms help keep your high-risk patients safe and secure by alerting you when a patient leaves the chair or bed.

Beyond Products

The right products are critical to falls prevention. But it's a complex issue that also demands additional support, and Medline is here to help.

It doesn't end with our products.

As part of our Stand FIRM programme, we offer much more than products. We know that no one product or intervention is the silver bullet in preventing all falls, so we have built a programme to support the most important part of any falls management initiative—your team.

Long-term collaboration

Our Medline clinical specialists are available to support you as you strengthen your falls management programme. From high-level evaluations to effective implementation of our products, they are your partner in combating falls.

Educational materials

Keep everyone engaged in the fight against falls by providing simple and positive educational materials that promote falls prevention guidelines.

Online knowledge base

Medline's in-depth articles about falls prevention topics provide relevant tools and resources for your staff.

Sharing of best practices

Facilitating the sharing of best practices, Medline organises regional round tables for our customers who are involved in falls prevention initiatives.
