

**DISPOSABLE HEADWEAR**  
Comfort and Variety

# MEDLINE HEADWEAR

Covering your head and hair helps reduce the risk of foreign particles getting into surgical wounds and protects patients from potential contamination in operating theatres or intensive care units. Medline's disposable headwear products offer a high level of comfort and come in a variety of shapes, sizes and designs that address hospitals' protective and aesthetic needs.

Our broad product range, including surgical hoods and caps, bonnets and bouffant caps, is suitable for a variety of operations and hairstyles. To offer you even more choice and meet your budget, Medline's headwear is available in cluster keyback, viscose and spunbond polypropylene materials that have passed biocompatibility requirements, are low linting and do not contain latex.

## Comfort Line

The Comfort Line is Medline's preferred headwear product range for the operating theatre. Made of soft and breathable cluster keyback fabric, this line offers both a high level of comfort and a high level of protection. Comfort Line products are available in blue and green and a large variety of designs. Medline is committed to sourcing products from ethical and socially responsible factories around the world. Our Comfort product range is produced in a Worldwide Responsible Accredited Production (WRAP) certified facility.

## Colourful Line

The Colourful Line is made of spunlace viscose, which is a soft, breathable and cotton-like material. The range comes in a variety of colours and offers good comfort. Medline is committed to sourcing products from ethical and socially responsible factories around the world. Our Colourful product range is produced in a Worldwide Responsible Accredited Production (WRAP) certified facility.

# CHOOSE YOUR HEADWEAR

## Surgical Hoods

Offering a helmet-like cap with ties at the neck, one-size-fits-all surgical hoods provide the most coverage of all products in our headwear range for worry-free performance during surgery.

Some products feature an absorbent sweatband for increased staff comfort, especially for longer procedures.

## Surgical Caps with Ties for Long and Short Hair

Featuring ties at the back of the neck, these adjustable surgical caps are designed for people with long or short hair to safely keep the hair covered.

This surgical cap is ideal for use in the operating theatre or for day surgeries.

## Surgical Caps with Elastic at the Back

Featuring a broad shape and elastic at the back, these one-size-fits-most surgical caps provide a comfortable and secure fit, meeting the requirements of the most active of days.

This cap design is well-suited for long hairstyles and long periods of wear in the operating theatre, ICU and other laboratory departments.

## Ordering Information

Item	Description	Packaging

## Surgical Caps without Ties or Elastic

These surgical caps do not contain ties or elastic, which makes them comfortable for longer periods of wear thanks to their lack of pressure areas. The caps are designed to fit well around the head due to the natural elasticity and flexibility of the material.

The caps are ideal for nurses or visitors in the operating theatre and ward staff with short hair. Additionally, the edge of the bonnet (FS67050) can be tuned up to function as a sweatband for even more comfort.

Item	Description	Packaging
FS61450	Cluster keyback, blue	100/bx, 600/cs
FS63450A	Spunbond polypropylene 30 gsm, blue	100/bx, 600/cs
FS67050	Spunlace 35 gsm, blue	100/bx, 600/cs

## Bouffant Caps

These light and roomy caps with a round shape feature elastic all the way around, ensuring all hair is fully and securely covered and that the cap fits comfortably.

Bouffant caps are suitable for long and short hairstyles and provide comfort and breathability for staff in less critical areas in the hospital.

Very similar to the design of the bouffant cap, the compactly packed clip cap is ideal headwear for patients and visitors in less critical areas of the hospital.

Item	Description	Packaging
