

Surgical Gloves

A range of solutions

**Keeping
hands
protected**

Hand health

An under-reported issue

Hand health issues, though prevalent, are often under-reported by many of the affected healthcare professionals. Poor hand health can result in compromised clinical performance, critical staff absences and general discomfort. At Medline, our portfolio of gloves aims to **protect** hands and help **improve** performance.

800+

NHS staff are off sick every day due to skin-related issues¹

Did you know?

93%

of clinicians had at least one skin issue over a 12-month period,

with only **22%** reporting it as an issue.²

86%

of healthcare workers with hand dermatitis had a reaction to the accelerator diphenylguanidine (DPG).³

The rate of latex-based allergies amongst healthcare workers is **3x higher** than in the general population.

Introducing Isolex

Liquid synthetic latex emulsion

Safety. Synthetic alternative to natural rubber latex (NRL)

- Eliminates the risk of developing Type I latex allergies
- Water-based emulsion of polyisoprene

Performance. Molecular structure virtually identical to NRL

- Soft, comfortable fit and feel
- Ideal for when tactile sensitivity is required

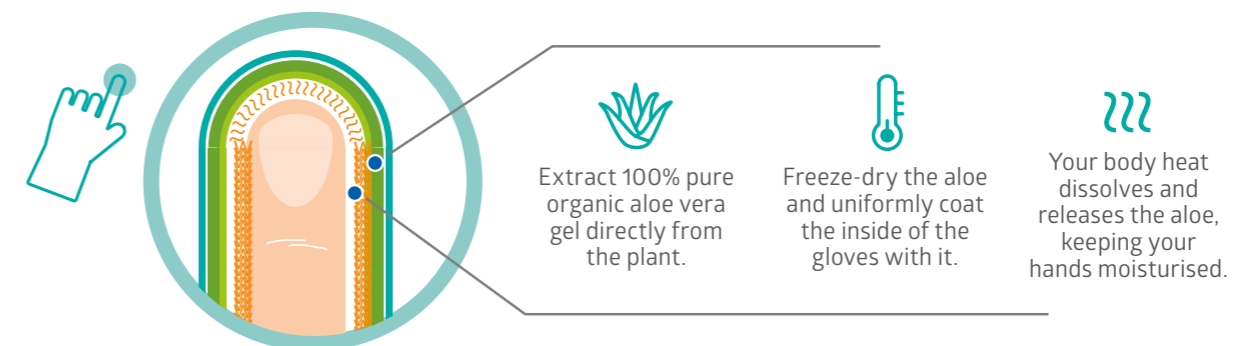

Quality. A proprietary formulation with the end user in mind

- Made with the safest ingredients to help reduce allergies
- 100% DPG-free and HPLC-tested for chemical accelerators

Advancing the power of aloe

Our SensiCare® PI Green range contains an inner coating of 100 per cent pure organic aloe vera gel, helping to soothe and moisturise the skin when double gloving.

A complete portfolio to protect your hands

SensiCare® PI

Proprietary Isolex polyisoprene
