

VAPrevent®

Achieve patient comfort, staff compliance and infection prevention

Oral care solutions

VAP prevention

Ventilator-associated pneumonia (VAP) is a leading cause of death in critically ill patients. That's why good oral hygiene is essential for maintaining healthy oral flora and fewer infections. Medline's oral care portfolio includes 24-Hour Kits that contain everything needed for sufficient oral care over 24 hours, as well as individual trays, which are ideal for patients with specific oral hygiene needs. Trays are also suitable for those being moved out of the intensive care unit (ICU) who don't need a full 24-Hour Oral Care Kit.

Medline's products help you maintain compliance with oral care guidelines for your most vulnerable patients while fighting VAP and hospital-acquired pneumonia (HAP) in your facility.

Research shows that oral care protocols can help lower the risk of developing VAP by 46%.¹

of nurses in Europe feel they don't have appropriate tools to provide oral care to their patients.²

VAP affects 5 to 40% of patients who are ventilated for more than 2 days.³

Studies suggest VAP can lengthen patients' stay in the ICU by 6 to 10 days.⁴

Researchers report that VAP-related care can cost between €10,800 and €51,000 to treat.⁵

24-Hour Kits drive the highest levels of compliance

Medline's 24-Hour Kits offer all necessary components for a full day of oral care for one patient, and are conveniently packaged in a dispenser box. The two different types of trays are colour-coded to help healthcare workers quickly know which one to use, and let others easily check whether proper care has been performed. Furthermore, the dispenser box has three convenient storage solutions, thanks to a paper strap, allowing you to hang the kit on the wall or a ventilator, or place it on the bedside table.

Code	Description	Toothbrush tray	Swab tray
Q800*	Q8 24-Hour Oral Care Kit with moisturiser	2x 1 suction toothbrush, 1 suction swab, 2 DenTips, 1 moisturiser	1x 1 suction swab, 2 DenTips, 1 moisturiser

Single-Tray Kits for convenience and improved processes

Each kit contains every item you'll need.

The cup is provided as the perfect place to pour the prescribed solution to perform oral care.

Individual Oral Care Kit standard*

The kit contains:

- 2 DenTips green oral swabs, treated with dentifrice
- 1 packet of Medline Mouth Rinse (7 ml)
- 1 packet of Medline Mouth Moisturiser gel (3 g).

MDS096013MEU	VAPprevent Oral Care Kit standard	100 ea/case (100 kits/case)
--------------	-----------------------------------	--------------------------------

Individual Oral Care Kit with suction swabs*

The kit contains:

- 2 suction swabs treated with dentifrice
- 1 DenTips oral swab.

Also available with Mouth Rinse and Mouth Moisturiser

MDS09651300EU	Solution-free VAPprevent Kit with suction swabs	100 ea/case (100 kits/case)
MDS096513MEU	VAPprevent Kit with suction swabs and solution	100 ea/case (100 kits/case)

Individual Oral Care Kit with suction toothbrush*

The kit contains:

- 1 untreated suction toothbrush
- 1 untreated DenTips blue oral swab.

Also available with Mouth Rinse and Mouth Moisturiser

MDS09657200EU	Solution-free VAPprevent Kit with suction toothbrush	100 ea/case (100 kits/case)
MDS096572MEU	VAPprevent Kit with suction toothbrush	100 ea/case (100 kits/case)

Accessories

Flexible suction tubing connector**

The flexible tubing connector with two female ends makes it unnecessary to cut tubing to fit suction tools.

VAPCONNECT	Suction tubing connector	25 ea/box (1,000 ea/case)
------------	--------------------------	------------------------------

Flexible Yankauer with female connector

These yankauers are suitable for use during oral aspiration, suction-assisted laryngoscopy and airway decontamination.

Y1800F	Flexible yankauer with female connector, with 250-mm length and 18-CH diameter	50 ea/case
Y2200F	Flexible yankauer with female connector, with 250-mm length and 22-CH diameter	50 ea/case

Individual items to implement a step-by-step protocol

DenTips® oral swabs*

DenTips are used to remove mucus build-up from a patient's mouth. Green DenTips, with a sponge treated with a dentifrice, provide additional cleansing of oral tissues.

MDS096202EU	Blue swab individually wrapped	Untreated	500 ea/case (500 swabs/case)
MDS096206EU	Blue swabs wrapped in a bag of 20	Untreated	50 ea/case (1,000 swabs/case)
MDS096208EU	Blue swabs bulk	Untreated	1,000 ea/case (1,000 swabs/case)
MDS096502EU	Green swab individually wrapped	Treated	500 ea/case (500 swabs/case)
MDS096504EU	Green swabs wrapped in a bag of 10	Treated	100 ea/case (1,000 swabs/case)

To activate the dentifrice, use the patient's saliva or a small amount of water.

Suction swab and toothbrush*

Suction swabs and toothbrushes can be connected to a standard suction line and controlled by using the thumb port.

MDS096525EU	Suction swab individually wrapped	Treated	100 ea/case (100 swabs/case)
MDS096575EU	Suction toothbrush individually wrapped	Untreated	100 ea/case (100 toothbrushes/case)

Toothbrushes

The adult and mini toothbrushes, with exceptionally soft bristles, are gentle on the teeth and gums and provide effective oral cleaning.

MDS096082	Adult toothbrush	72 ea/case
TB001**	Mini toothbrush	500 ea/case 100 ea/box

Mouth Moisturiser

Applying Medline's Mouth Moisturiser with DenTips to a patient's lips and oral tissues protects them from drying out.

MDS096803E	Mouth Moisturiser	100 ea/case
------------	-------------------	-------------

Antiplaque Mouth Rinse

Medline's Antiplaque Mouth Rinse helps with the removal of dental plaque. It contains 0.12% chlorhexidine and xylitol, which promote clean, fresh and pleasant breath. In addition, continued use increases the effectiveness of brushing, and plaque removal is enhanced, thereby helping to improve the hygiene of the gums.

MDSCHG15	Medline Antiplaque Mouth Rinse	70 ea/case
