Patient care at Medline

Medline is dedicated to providing solutions that help enhance **staff efficiency**, improve **patient safety** and deliver the very best **patient care**.

Medline provides a variety of solutions for **patient care**. With this brochure, we would like to highlight some of the products in our portfolio that can be used throughout the day during a patient's stay in your facility.

In addition to high-quality products, our knowledgeable team is ready to work with you and be **your partner** in providing better patient care.

EasyBath® Shampoo Caps allow hair to be washed and conditioned from the hospital bed without water.

Our slipper socks offer two-fold traction and warmth.

Ensure your patients have a pleasant hospital stay and are secure on their feet with our **Double-Tread Slipper Socks**.

Medline's **VAPrevent 24-Hour Kits** offer all necessary tools for a full day of oral care for one patient.

The **Antiplaque Mouth Rinse** contains 0.12% chlorhexidine, which helps remove plaque and increases the hygiene of the gums.

Offer a rinse-free bathing experience to your patients with our **EasyBath®** bathing wash gloves or cloths and reduce the time needed to perform patient bathing.

Eight gloves or cloths are included per pack for use on different body parts.

Keep your patient's skin dry for longer with **Ultrasorbs® Disposable Drypads**.

Their super absorbent polymer technology wicks away bodily fluids, keeping skin dry for longer.

Help improve the safety of adult patients while simplifying nurses' duties with easy-to-use tools that require fewer personnel.

100% biodegradable and dispersible **ReadyFlush®** wipes can be flushed safely.

These wipes are ideal for personal clean-up and continence care.

To be labelled 'flushable' by the Disposables and Nonwovens Association (EDANA), **ReadyFlush** wipes had to pass seven tests that evaluated their ability to disintegrate, biodegrade and clear septic systems and sewer lines.

Reposition your patient safely with 35 per cent less effort using **Comfort Glide® Sheets**.

Keep your patient's skin dry with **Comfort Glide® Drypads**.

Safely roll your patient into the 30-degree lateral position with **Comfort Glide® Wedges**.

Medline's heel protection solutions **HEELMEDIX®** and **HEEL RAISER Pro®** effectively help offload pressure from the heels.

Avoid external rotation and keep patients' feet in the right position.
