

# Patient wear

Offering the best of patient care and operating theatre efficiency

**Dress your  
patients for  
success**

# Patient gowns

At Medline, we think the quality of the product contributes to the quality of care that patients receive during their time in the hospital. Product quality can also help increase patients' satisfaction with their hospital stay.

Our patient gowns provide your patients with opacity, comfort and modesty during hospital stays because they are manufactured from a soft, non-woven SMS material.

The Medline range provides a wide variety of designs to meet the needs of your department. Choose from a selection of patient gowns with front openings, back openings or hook-and-loop fasteners on the sleeves.

# Patient kits

Our expertise in medical apparel design and manufacturing allows us to offer new solutions for day surgeries. With efficiency in mind, Medline has created a variety of patient kit solutions and a visitor kit to suit your needs and budget.

The kits contain single-use patient apparel, which patients can wear during the diagnostic procedure or day surgery. All components are conveniently packed in a single bag that can be given to the patient upon arrival. This also makes stock management easier with one item to replenish rather than five individual components.

As a global leader in medical devices, we apply the highest quality standards to our products along each step of the manufacturing and assembly process.

Item number	Size	Description	Qty/cs
