

Perineal Instant Cold Pack

For comfort and pain relief

Did you know?

A majority of women suffer from perineal trauma during normal vaginal delivery. Up to nine in every 10 first-time mothers who give birth vaginally will experience some sort of tear, graze or episiotomy. Perineal trauma is largely associated with pain and complications after the childbirth.¹

How are we responding to this?

Medline's Perineal Instant Cold Pack helps soothe soreness and reduce swelling after labour or surgery. This product can be applied directly to the perineal area to provide maximum cold comfort.

Key benefits and features

- Provides extra absorbency via long front-to-back area
- Easy to apply and remove
- Adhesive strip to ensure secure placement
- Intended for single-use

Ordering information

Reference	Description	Dimension	Pack component number
CPACKP	Perineal ice pack	11.4 x 36.2 cm (4.5 x 14.5 in)	24

Best practice tip

Applying this pack for less than 20 minutes at a time helps prevent nerve, tissue and skin damage.
