Nitrile Gloves

A close-up photograph of a hand wearing a white nitrile glove. The gloved hand is gently holding a smaller, bare hand with pink nail polish. The background is a soft, out-of-focus light color. The entire image is framed by a white border.

**END YOUR GLOVE/HATE
RELATIONSHIP.**

YOU CARE FOR PATIENTS. OUR GLOVES CARE FOR YOUR HANDS.

Nurses have their hands full taking care of patients and residents all day, every day. And the necessity to use gloves creates an endless moist/dry cycle that may lead to dry, irritated skin. Restore Nitrile Gloves are Medline's first gloves to use colloidal oatmeal to add comfort to your most valuable tools, the hands of your staff.

WHAT IS COLLOIDAL OATMEAL?

Colloidal oatmeal is simply oats that have been ground very finely to provide maximum benefit by exposing more of their valuable components. The United States Food and Drug Administration has indicated that colloidal oatmeal can temporarily protect and help relieve minor skin irritation and itching due to rashes or eczema.

Colloidal oatmeal has a long history of beneficial use in dermatology.¹

HOW DOES IT WORK?

Restore Nitrile Gloves put a layer of colloidal oatmeal between the skin and the glove. This helps maintain the skin's moisture to prevent conditions associated with dry skin. The colloidal oatmeal works while you work to help skin feel softer and smoother.

Colloidal oatmeal helps relieve irritation and itching associated with dry skin.

RESTORE NITRILE GLOVES MAKE IT EASY TO LOVE YOUR GLOVES WITH THESE ADDITIONAL FEATURES:

- » **Packaging efficiency** – MicroStop, a clear barrier film on the opening of the box, helps keep gloves from falling out, so you dispense only what you need, reducing waste.
- » **Soothing colour** – Restore Nitrile Gloves' creamy white hue looks as soothing as it feels on your hands.
- » **Colour-coded sizing** – Each box features a colour associated with a specific size, which allows you to easily select the right glove, every time.
