

SPTSmart

Standard Surgical Packs

Surgical supply management solutions

**A higher
standard of
value and
performance**

Analysing every surgical procedure, every operational cost, every lead time

Medline recognises your operating theatre challenges and continues delving into them until we find faster, smarter and more cost-efficient solutions for you to get things done. We watch. We listen. We get results!

With more than 20 years of experience on the market and a continually developing product and solutions portfolio for our customers, Medline is proud to announce a new range of standard surgical packs.

Medline's SPTSmart is a selection of standard surgical packs for the most commonly performed procedures. These packs are ready for shipment from each of our six warehouses and distribution centres in Germany, France, Ireland, the United Kingdom, mainland Spain and the Canary Islands.

No more waiting for production, assembly, sterilisation and transportation. You choose. You order. We deliver!

Product breadth and outstanding consulting services

Some procedures benefit from the reliability and cost-effectiveness of a standard pack. Whereas other more complex or specialised procedures require the customisation and flexibility that our Custom Surgical Packs offer.

With Medline, you can have it all. Our team of experts is ready to work with you and analyse your current practices to recommend the right pack for each procedure and the best mix of packs to meet your needs.

These SPTs can help you:

- Reduce delivery lead times
- Streamline inventory
- Increase financial savings on a standardised product
- Maintain quality patient care and staff safety
- Improve efficiency and convenience
- Ensure consistency and value
- Create standard practices in your facility.

Q: What happens if I need to make a component change or want to include products from another brand?

A: No problem. Ask your Medline account manager about our Custom Surgical Pack programme today!
