

Single-Use Scrub Suits and Warm-Up Jackets

**Safety,
variety and
comfort**

Medline single-use scrub suits

Medline has been manufacturing and delivering protective apparel for over 40 years. This experience has given us profound expertise in always meeting or exceeding infection control protocols and providing you the comfort you need to handle the pressure of an intense day.

We know how much you rely on this disposable apparel to keep your staff comfortable and your patients safe, and that is why we offer three ranges of scrub suits and Warm-Up Jackets.

Medline delivered more than **6.5 million** scrub suit sets in 2021 to more than **550 European hospitals**.

Keep your patients safe

Single-use scrub suits are made of exclusive and rigorously tested fabrics that have lower linting properties compared to reusable scrub suits. Also, because they are single-use, you can be sure they are always clean.

Offer consistent product quality

Disposable scrub suits offer you consistency in appearance, colour and design, and are available in a wide variety of sizes. Enjoy a clean, comfortable and new product every day.

Your benefits

Avoid laundry service issues

With reusable cotton scrub suits, a poor laundry service level can mean bad washing quality or delivery delays for much-needed apparel, causing disruption to your daily activities.

Eliminate hidden costs

While it is sometimes difficult to evaluate the total costs of reusable scrub suits due to reprocessing, single-use scrub suits offer you clear visibility on your expenses.

Introduce colour coding

Our disposable scrub suits are available in a variety of colours, providing an ideal way to identify the different types of healthcare professionals in the operating theatre.

A scrub suit designed with you in mind

We have worked with healthcare professionals like you to create our scrub suits with features you want and need to perform at your best. Experience new, clean apparel every day.

Bell-shaped design for a perfect fit

3 convenient pockets on the shirt

V-necked

Adjustable waist ties

Shirt and pants packed separately

Carefully selected materials

Medline's disposable scrub suits offer a high level of comfort thanks to their ultra-soft and breathable SMS material with the following features:

Great opacity

Low-linting

Anti-static

Latex-free

Soft Scrub Suits range

Essential apparel to meet daily challenges

- » Manufactured from 35-gsm SMS material with optimal opacity and softness
- » Available in 7 sizes from XS to 3XL
- » Available in **blue** and **green** with shirt and pants packed separately or in sets

Ultimate Scrub Suits range

Our top-of-the-line ultra-soft range for demanding activities

Medline's Ultimate Scrub Suits offer that extra comfort, breathability and protection you and your patients deserve.

- » Manufactured from 45-gsm SMS material with excellent opacity and softness
- » Available in 7 sizes from XS to 3XL
- » Available in **blue** with shirt and pants packed separately

Protective Apparel Dispenser

Medline's Protective Apparel Dispenser is a convenient solution for the storage and distribution of non-textile garments in healthcare facilities. Our smart dispenser functions like a vending machine and provides you with the right product at the right time.

The dispenser can neatly store and distribute a variety of protective apparel products. It has a modular structure and, depending on its width, can fit up to 400 items per module, so you can easily customise its size to your needs. The dispenser modules are available in two different dimensions: 70 centimetres wide and 115 centimetres wide.

What are the key features of Medline's Protective Apparel Dispensers?

- » **Online management:** Each dispensing machine is connected to MedStock, which is Medline's web-based inventory management platform. MedStock provides real-time utilisation reports and allows you to create new users and remove old ones.
- » **24-hour service:** The machine offers a garment dispensing service 24 hours a day, 7 days a week.
- » **Modular, scalable design:** Thanks to the modular nature of the system, the dispensing capacity of the machine can be increased by simply adding new modules.
- » **Inventory visibility:** The glass window lets you see the items that are inside.
- » **Financial savings:** The dispensing machine aids in optimising garment use and, therefore, saving money.
- » **Product mix:** Up to 8 different products can be stored inside each module.

How does it work?

- The user identifies himself or herself with either a badge or an access code.
- The user then selects the size and type of garment needed.
- The garment is immediately released from the machine to the user.
- The system registers the selection and assigns it to a cost centre.

MedStock

MedStock is an online inventory management platform and offers a wide range of graphs that can help you monitor and control product consumption in your facilities. Just by entering a date range, you can generate graphs showing product usage by category, product usage over time, cost centre allocation and consumption per user.

Scrub suit ranges packed as a set

Size	Soft range blue	Soft range green	Packaging
XS	P35PBXS	P35PGXS	1/bag, 25/case
S	P35PBS	P35PGS	1/bag, 25/case

Top 3 reasons to choose Medline

No. 1: As a worldwide leader in disposable apparel, Medline provides stable supply and consistent product quality.

No. 2: Medline helps you increase patient safety by producing disposables made of low-linting material.

No. 3: Medline offers hygienic and comfortable apparel, designed in partnership with healthcare professionals.

Warm-Up Jackets

During the winter, healthcare professionals may be exposed to colder areas in the facility when transferring patients between departments. Keep your professionals comfortable and warm with Medline's selection of Warm-Up Jackets.

1

Reduce costs

During the winter months, you may see an increase in the use of sterile surgical gowns. Staff often wear these for extra warmth. By offering Warm-Up Jackets, you can help reduce costs while helping your staff comply with hygiene protocols.

2

Keep your staff warm and comfortable

Medline's Warm-Up Jacket ranges are designed with materials that ensure a high level of comfort while keeping your staff warm. Additionally, they feature an intuitive design with a gentle knit collar, knit cuffs or elastic wrists, and 3 handy pockets.
