

ZR® Pre-filled Flush Syringes

Help reduce the risk of syringe-generated blood reflux

**Clear the
path**

Flush away catheter issues.

Syringe-generated blood reflux can cause a range of serious complications, including delays in patient care, increased risk of infection, and added costs.

Medline's ZR® Pre-filled Flush Syringe minimises the risk of catheter blockage to enhance patient safety and help improve outcomes.

Benefits and features:

- Helps to lower the risk of medication error by way of clearly marked saline labels
- Latex-, DEHP-, PVC- and preservative-free
- Provides enhanced safety through terminal sterilisation
- Facilitates speedy inventory control and the minimisation of errors via a data-matrix barcode
- Ready-to-use system via a tip cap to lower the risk of microbial contamination
- No more needles required throughout the whole flushing process

Item number	Description	Packaging
EMZG131800*	3 ml saline in 10 ml syringe	100 units per box, 8 boxes per case, 800 units per case
