

SENSICARE® ICE

Powder-free Nitrile Exam Gloves

We know that latex allergies are on the rise and that you're looking for latex glove alternatives to protect both patients and staff. Nitrile gloves are a popular option, but they still have shortcomings. Though they're known for offering the same great protection in high-risk and high-stress environments, nitrile gloves tend to be stiff and uncomfortable. With Medline's new SensiCare® Ice examination glove, you can finally have it all – the comfort of latex in a nitrile glove. This glove can be used facility-wide, from the ICU all the way to phlebotomy. Sensitivity and peace of mind...the SensiCare® Ice from Medline.

Item Number	Size	Packaging
