

SENSICARE® FREE NITRILE

Don't just react to allergies, prevent them

A safer alternative. While healthcare professionals are very aware of the dangers of latex allergies, what can go unnoticed are the allergies that may be caused by chemical accelerators used in the manufacturing process of gloves. Senticare Free provides an ideal solution for those suffering from these allergies and also works as a preventative action against development of future allergies. 100% of patients with dermatitis cases had their condition improve after the switch to an accelerator free glove².

- 74% of allergic dermatitis cases are related to occupation².
- Out of all occupations, healthcare workers have the greatest risk of suffering from an allergy¹. 70% of occupational allergic contact dermatitis cases are in healthcare workers².
- 82% of occupational skin disease patients reported having changed their work because of their condition and 48% had been on sick leave for at least one period of 7 days³.

Switch to Medline Senticare Free to protect and prevent the allergies and negative impact chemical accelerators may have on your staff.

Item Number	Size	Packaging
MDSFREE-XS	X-Small	200 ea/bx, 10bx/cs
MDSFREE-S	Small	200 ea/bx, 10bx/cs
