

# Transparent Film and Securement Dressings

Comfortable securement for catheters, IVs and central lines

**It's time  
to make  
the change.**

# Secure protection, everywhere you need it

Every day, you're challenged to reach 'zero harm'. But central lines, catheters and IVs can not only be a source of discomfort for patients—but also a gateway for external contaminants that can increase the risk for bloodstream infections (BSIs). Our complete line of dressings helps keep lines comfortably in place while helping to block potentially harmful pathogens.

Our two brands offer increasing levels of performance. Featuring large viewing windows, body-conforming designs and non-irritating adhesives, each of our dressings is designed to be comfortable and breathable—and secure against harmful pathogens.

## Customised coverage and convenience

You can also find these dressings in our vascular access kits, helping you:

- Reduce waste
- Save time
- Optimise care

## Full spectrum protection

+++

### Suresite®

Versatile transparent dressings, priced to fit every budget

++++

### Suresite® Select

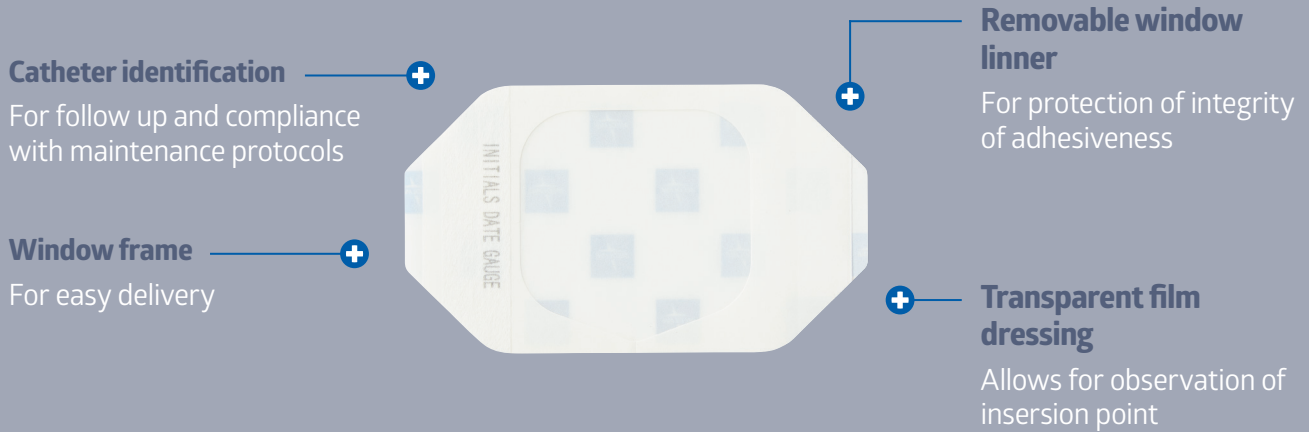

Level up to our fabric dressings with extra-wide viewing windows and innovative adhesives

# Suresite®

## Secure, clean, comfortable

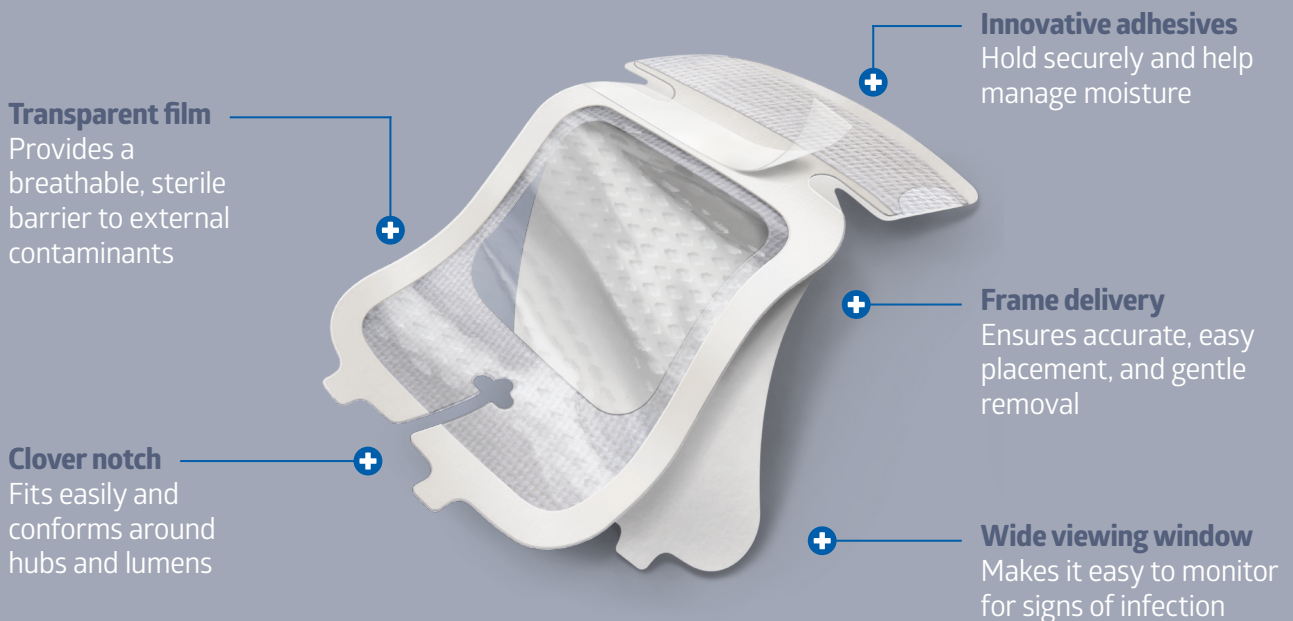

Providing the assurance you need, Suresite transparent film dressings are designed to cover and protect catheter sites, and secure devices to the skin. Available in a variety of sizes, configurations, and delivery systems, each Suresite dressing is tailored to be conformable and breathable, not stick to itself, and maintain a barrier against external contaminants.

# Suresite® Select

## Protection you can count on

Suresite Select sterile dressings are designed to seal completely, hold the catheter firmly in place and help prevent harmful microorganisms from entering the site. And with its exceptionally wide viewing window, Suresite Select also makes it easy to monitor for signs of infection.

# Ordering information

## Suresite® Dressing

Item number	Description	Packaging
