

Warm-Up Jackets

During the winter, healthcare professionals may be exposed to colder areas in the facility when transferring patients between departments. Keep your professionals comfortable and warm with Medline's selection of Warm-Up Jackets.

1

Reduce costs

During the winter months, you may see an increase in the use of sterile surgical gowns. Staff often wear these for extra warmth. By offering Warm-Up Jackets, you can help reduce costs while helping your staff comply with hygiene protocols.

2

Keep your staff warm and comfortable

Medline's Warm-Up Jackets ranges are designed with materials that ensure a high level of comfort while keeping your staff warm. Additionally, they feature an intuitive design with a gentle knit collar, knit cuffs or elastic wrists, and three handy pockets.
