

Warm-Up Jackets

Keep your professionals comfortable and reliably warm—even during longer procedures in cold operating theatres with Medline's selection of Warm-Up Jackets.

Non-woven, disposable Warm-Up Jackets are convenient apparel that is clean and fresh for each use. The soft, low-linting material is ideal for maintaining a clean hospital environment and reduces the risks of cross-contamination.

1

Reduce costs

During the winter months, you may see an increase in the use of sterile surgical gowns. Staff often wear these for extra warmth. By offering Warm-Up Jackets, you can help reduce costs while helping your staff comply with hygiene protocols.

2

Keep your staff warm and comfortable

Medline's Warm-Up Jacket ranges are designed with materials that ensure a high level of comfort while keeping your staff warm. Additionally, they feature an intuitive design with a gentle knit collar, knit cuffs or elastic wrists, and three handy pockets.
