

Maternity Catalogue

Everything you need in one place

**Small changes
to help make a
big difference
in maternity care**

What small changes could make a big difference to you and your birthing mums?

The challenges for modern-day midwives are unprecedented. For example, nursing and midwifery vacancy rates are as high as 10.3 per cent¹, whilst the sickness rate is 7 per cent²—leaving some maternity services teams very short-staffed.

Maximising the time that is available to care for mothers giving birth is, therefore, paramount. This is where Medline can help.

Our range of products for maternity-related care/services have been developed to help you make small changes that can make a big difference.

The solution could be a moisture-wicking pad to stop fluids from getting to the floor, or a simple C-section procedure pack, available 'off the shelf', which eliminates time spent on gathering components. It could also be a surgical drape that enables immediate skin-to-skin contact for mother and baby, even during special circumstances like C-sections.

We have everything you need.

Spontaneous vaginal delivery

Small changes, big difference

From her arrival on the labour ward to departing with her healthy newborn baby, every mother needs a great deal of care and support, to help ensure she has the best birthing experience whilst doing everything possible to mitigate risk.

In this section, you will find simple solutions that can save you precious minutes every day, whilst also helping to protect mothers from potential harms, like infection and skin damage.

Birthing Ball Cover

When the mother-to-be chooses to use a birthing ball to help her during labour, ensure her protection and a high level of hygiene with our Essential birthing ball cover.

Item code	Description	Size
SPTE-ESBB01	Essential ball cover, bilaminate	One size

Emesis Bag

Disposable emesis bags provide a safe and easy solution for the collection, containment and disposal of vomitus—saving more time and reducing the risk of cross-contamination.

Item code	Description	Size
EMB01	Emesis bag; blue	144/cs
EMB02	Emesis bag; clear	144/cs
DISP01	Dispenser for emesis bags; wall-mounted, holds 24 pc	6/cs

Skin health

Skin health is not always at the forefront of your mind while anticipating the delivery of a newborn baby. Still, some women have a higher risk of skin breakdown than others during labour and birth.³

The 'perfect storm' for skin breakdown can be created by: (i) reduced mobility, due to a combination of interventions, including epidural, along with excess moisture via amniotic fluids;⁴ and (ii) increased pressure/friction, due to positioning and movement throughout labour.³

Managing moisture and keeping expectant mothers' skin dry during labour and delivery is a crucial factor in preventing skin breakdown.⁴

Ultrisorbs Drypads Moisture Management System

Absorbs more. Breathes more. Contains more.

Item code	Description	Size
ULTRASRBE4561	Ultrisorbs AP; 45 x 61 cm	60/cs
ULTRASRBE6191	Ultrisorbs AP; 58.4 x 90 cm	70/cs
CGDRYPAD	Comfort Glide Drypad; 91.5 x 145 cm	60/cs
CGDRYPADXL	X-large drypads; 101.6 x 203.2 cm	40/cs

Post-partum care

Our perineal instant cold pack offers your patient a complete solution for use after birth that combines absorption and cooling.

Item code	Description	Size
CPACKP	Perineal instant cold pack; with adhesive band	11.4 x 36.2 cm

Assisted vaginal delivery and aftercare

Small changes, big difference

Nearly 50 per cent⁵ of all births require some form of intervention, be it C-section or assisted delivery (e.g. with forceps).

Time-related pressure becomes a major factor in these situations, so it is vital that no minutes are lost searching for basic components, like drapes, swabs and scissors.

In this delivery suite section, you will find time-saving solutions like an under-buttocks drape with double-graduated pouches for measuring fluid loss and containing placenta, or small delivery and episiotomy kits to help you save on time used searching for instruments and other components.

Delivery drapes

Medline offers a wide range of under-buttocks drapes to help you protect your patients with a proper sterile barrier.

Measuring fluids during a delivery or an episiotomy suture is fundamental, and for that reason, Medline developed different pouch options with a graduated scale.

Item code	Description	Size
8484CEA	Under-buttocks drape; with graduated pouch	96 x 118 cm
4575CE	Under-buttocks drape; with closable pouch and graduated pouch	96 x 120 cm
4576CE	Under-buttocks drape; with detachable fluid collection pouch and graduated pouch	96 x 120 cm
DYNJPE6004	Under-buttocks drape; with pouch filter and port	102 x 112 cm
8483CEA	Under-buttocks drape; reinforced	96 x 126 cm

Simple pouch 8484CEA

Double pouch 4576CE

Other drapes

Below, you will find a list of additional drapes, as well as additional leggings.

Item code	Description	Size
ES10459CE	Essential drape; bilaminate, central round adhesive fenestration, Ø 12 cm	220 x 240 cm
ES10453CE	Essential drape; bilaminate, offset round adhesive fenestration, Ø 12 cm	220 x 240 cm
ES8420CE	Essential leggings; bilaminate	75 x 120 cm
8420CEB	Advanced leggings; SMS	79 x 140 cm

Epidural drapes

Medline has designed this range of drapes for an enhanced experience during epidural procedures.

Item code	Description	Size
8461CE	Epidural drape in clear PE; adhesive upper edge, offset round adhesive fenestration, Ø 9 cm	60 x 100 cm
8465CE	Epidural drape in clear PE; adhesive upper edge with a pre-cut offset oval adhesive fenestration, 6 x 10 cm	80 x 140 cm
ES15003CE	Epidural Essential drape; bilaminated, adhesive upper edge, central diamond-shaped adhesive fenestration, 8 x 8 cm	60 x 80 cm
ES30009CE	Epidural Essential drape; bilaminated, adhesive piece per corner, central oval adhesive fenestration, 8 x 18 cm	80 x 120 cm

Epidural drape
8465CE

Standard draping packs

This standard pack category contains all the drapes and equipment protection you need for your maternity-related procedures.

Maternity Examination Pack - ES15310CE

Quantity	Description	Size
1	Essential drape; bilaminate	75 x 90 cm

Other Medline products for assisted vaginal deliveries

Comfort Glide Repositioning Wedges and Drypads

- Designed with 30-degree tilt to help with repositioning and protect bony prominences
- Non-slip base with wipe-clean fabric

Visitor and patient kits

Medline's convenient single-use visitor kits can be quickly issued to the mother and her birthing partner, saving you valuable time each day.

For more information, see page 16.

Floor safety solutions

Our complete floor safety portfolio addresses the hazard of falls, as well as the need for quick fluid removal and to improve safety in the work environment.

C-section delivery

Small changes, big difference

Over 30 per cent of all deliveries are now done via C-section.⁵ The post-natal risks are well-documented but there is also additional pressure on understaffed maternity teams. More resources are required for each delivery—combined with longer hospital stays.⁵

This is why Medline has developed simple time-saving solutions like an 'off-the-shelf' C-section procedure pack that is readily available and eliminates time spent gathering components for each procedure. In addition, convenient visitor kits are now available for birthing partners, making it quicker and easier for them to change into theatre-safe attire.

Visitor Kit

You may be spending valuable time each day finding scrubs for birthing partners and even patient gowns for some mothers set to give birth. How much time could you save if you did not have to do this?

Medline's convenient single-use visitor kits can be quickly issued to the birthing mother and her partner, saving you valuable time each day.

Each visitor kit contains a disposable scrub suit, shoe covers, white theatre cap and bag for the belongings of the birthing partner. The included items lower the risk of infection and make it easier to identify birthing partners.

Item code	Description	Size
P35PBL	Scrub suit set; large	One size
NONE27378	Mask; blue, with ties	One size
FS65360	Cap; white	53 cm
CRIE2010	Shoe covers; blue	40 cm

*More colours and sizes are available.

QuickSuite® Bed and Operating Table Protection System

QuickSuite provides coverage for operating theatre tables during C-sections. Specialised items—available as an entire kit (standard or customised) or as individual components—can reduce time spent on setting up and cleaning post use, as well as protect equipment and your patients.

Item code	Description	Packaging
DYKQSUITEL4CEA	QuickSuite kit (4 components)	2/pk, 6 pk/cs
DYND4090SBE	Sahara sheet; 102 x 229 cm	2/pk, 2 pk/cs
DYNDSD4060E	Drawn/lift sheet; white; 102 152 cm	20/cs
QSACOVER	Arm-board cover; 72.5 x 33.5 cm	100/cs

C-section delivery

Comfort Glide Repositioning Wedges

- Designed with 30-degree tilt to help with repositioning and protect bony prominences
- Non-slip base with wipe-clean fabric

Item code	Description	Packaging

Sterile gowns

When a sterile field is needed, your healthcare team can choose from one of our sterile gowns with wrap and hand towels.

Item code	Description	Size
S3545CEC	OPS Essential Standard gown; with 2 hand towels and wrap	130 cm
E3540CEA	OPS Ultragard High Performance Surgical gown; with poly-reinforcement, 2 hand towels and wrap	140 cm

This is a non-exhaustive list of our wrapped surgical gowns with hand towels. Please contact your account manager for more information.

See 'Assisted vaginal deliveries' section.

Epidural drapes

Medline has designed this range of drapes for an enhanced experience during epidural procedures.

See 'Assisted vaginal deliveries' section.

Immediate skin-to-skin contact

The birth of a baby is a unique experience and provides moments that should be treasured. Those moments include skin-to-skin contact, a moment like no other, which is instrumental to mother-baby bonding. For this reason, the World Health Organization (WHO) recommends it is facilitated.¹

However, special circumstances like caesarean sections delay not only the moment for skin-to-skin contact, but also, potentially, the onset of lactation and need for supplementation.

This is why Medline has worked with key opinion leaders (KOLs) to develop evidence-based solutions that enable more mothers to enjoy skin-to-skin contact, even in special circumstances.

Medline Skin-to-Skin Drape

After two years in development, Medline has created a new skin-to-skin drape, which ensures it is easier to safely have skin-to-skin contact whilst in the operating theatre.

Item code	Description	Packaging
ES10850CE	C-section drape skin; with fenestrated incise film, 360-degree FCP, 196/240 x 311 cm	6/cs

Curettage necessities

Uterine Curette

Medline is committed to providing a wide range of disposable vacuum curettes. Thanks to moulded markings for size and correct tip orientation, our curettes ensure safe and effective aspiration.

Item code			Size	
Straight	Curved	Description	Internal diameter	Length
UCS07	UCC07	Sterile curette; K-resin, latex-free, DEHP-free	7 mm	19 cm
UCS08	UCC08	Sterile curette; K-resin, latex-free, DEHP-free	8 mm	19 cm
UCS09	UCC09	Sterile curette; K-resin, latex-free, DEHP-free	9 mm	19 cm
UCS10	UCC10	Sterile curette; K-resin, latex-free, DEHP-free	10 mm	19 cm
UCS11	UCC11	Sterile curette; K-resin, latex-free, DEHP-free	11 mm	19 cm
UCS12	UCC12	Sterile curette; K-resin, latex-free, DEHP-free	12 mm	19 cm
UCS14	UCC14	Sterile curette; K-resin, latex-free, DEHP-free	14 mm	24 cm

Wide-Bore Tubing

Medline's swivel handle fits the most popular styles of curettes and adapts to most vacuum source connections. Made of transparent rigid plastic, the handle rotates up to 360 degrees to ensure the surgeon's comfort. A thumb-indexed ring also slides easily over the suction vents to securely control the suction.

Item code	Description	Size
TUB106H	Wide-bore tubing with a swivel handle; 10-mm inner diameter, PVC, latex-free, DEHP-free	2 m
TUB1010H	Wide-bore tubing with a swivel handle; 10-mm inner diameter, PVC, latex-free, DEHP-free	3 m
TUB106	Wide-bore tubing; 10-mm inner diameter, PVC, latex-free, DEHP-free	2 m
TUB1010	Wide-bore tubing; 10-mm inner diameter, PVC, latex-free, DEHP-free	3 m
TUBH	Swivel handle; 10-mm inner diameter, PVC, latex-free, DEHP-free	N/A

Accessory Port

Used to convert an accessory port into a patient port on a canister, it is compatible with wide-bore 10-mm inner diameter tubing.

Item code	Description	Size
ORADAPT10	Blue port convertor; PP, latex-free	Ø 10 mm x 10 cm

Sampling devices

To collect and retain specimens for analysis, insert the specimen sock into the accessory port of the Medline Suction Canister. This disposable item also connects to 7- to 10-mm inner diameter suction tubing.

Item code	Description	Size
OR123	Sock; short, white	Ø 7 mm x 9 cm
OR124	Sock; standard, blue	Ø 10 mm x 23 cm
OR125	Sock; white, standard	Ø 7 mm x 23 cm
OR169	Sock; standard, yellow	Ø 12 mm x 23 cm

Disposable Sampling Cup

The specimen cup collector effectively separates tissue from fluids by using an integrated filter.

You can fix the cup to the suction canister via the patient port or the tandem port (with a loose male adaptor), and connect it to 10-mm inner diameter tubing.

Item code	Description	Size
OR84	Specimen cup; transparent	Ø 10 mm x 10 cm
