SOCIAL RESPONSIBILITY	8

QUALITY

Consistency is key.

Medline is the world's largest manufacturer and distributor of exam gloves for good reason. We're committed to quality.

5-point quality process

- » **Process audits** – Our auditing process is meticulous and includes daily inspections by our quality inspector and weekly audits by our expert engineers.
- » **Automated vision system** – Through our AVS, we evaluate our gloves at various stages of the manufacturing process to help reduce imperfections.
- » **Continuous process inspection** – We inspect our gloves every step of the way, from raw materials to production, packaging and pre-shipment.
- » **Randomised quality testing** – We randomly test for quality in production and post-production, as well as in our Shanghai and Chicago testing labs.

Solid infrastructure

- » State-of-the art manufacturing facilities
- » Hundreds of local personnel dedicated to service, quality and social standards
- » Lab team focused on constant innovation

Rigorous product testing

- » Our exam glove portfolio is Category III PPE certified per regulation 89/686/EEC to provide additional protection from chemicals and microorganisms.

INNOVATION

Make your job easier.

We're always looking ahead to discover and innovate so our exam gloves can help you work more effectively and efficiently.

Microstop film

- » Covers the box opening to control the number of gloves dispensed, helping to reduce waste
- » Our SensiCare Ice, SensiCare Silk, SensiCare Extended Cuff, SensiCare Free, Curad 3G, Accutouch and Restore exam gloves are all protected with Microstop film.

Colour-coded sizing

- » Our convenient colour-coded sizing system cues you to quickly and easily choose the right size, helping to reduce waste and inefficiency.

#1

Medline is the world's largest manufacturer and distributor of exam gloves.

€548M

Our worldwide sales in exam gloves.

50

Medline's global distribution network consists of 50 countries.

MANUFACTURING

We make it happen.

As the largest exam glove supplier in the world, we connect you with the products you need, when you need them.

- » 50+ warehouses around the world for greater access to inventory
- » As the primary share owner at our factory, you're guaranteed first priority for supplies.
- » Geographic diversification and contingency contracts
- » Multi-source manufacturing options on high-volume products

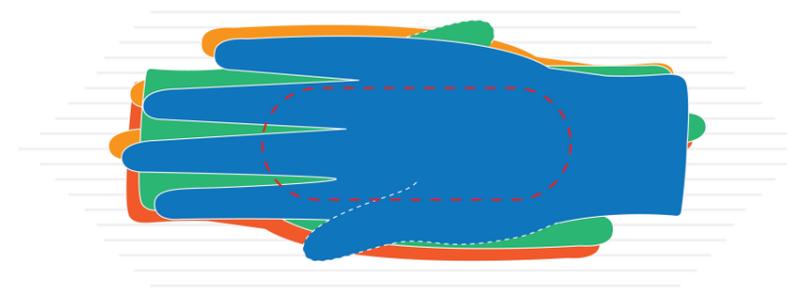

Automation moves us forward.

Flat-layer packaging

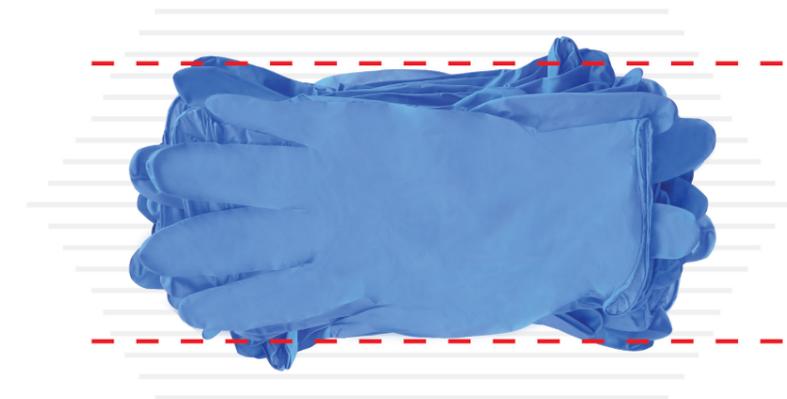

- » Our proprietary robotic smart packing system stacks gloves in a single flat layer within every box, helping to reduce waste and improve efficiency and satisfaction.

High-capacity production lines

- » Our state-of-the-art double production lines produce 45,000 gloves per hour.
- » Every phase of production is monitored through a robotic supervisory control and data acquisition system, ensuring consistency with every box.

■ 1st layer ■ 2nd layer ■ 3rd layer ■ 4th layer

When packing, no overlap occurs as gloves are neatly stacked to fit the box.

DISTRIBUTION

Streamline your inventory.

With more than 50 warehouses around the world, the journey between you and your products is never far.

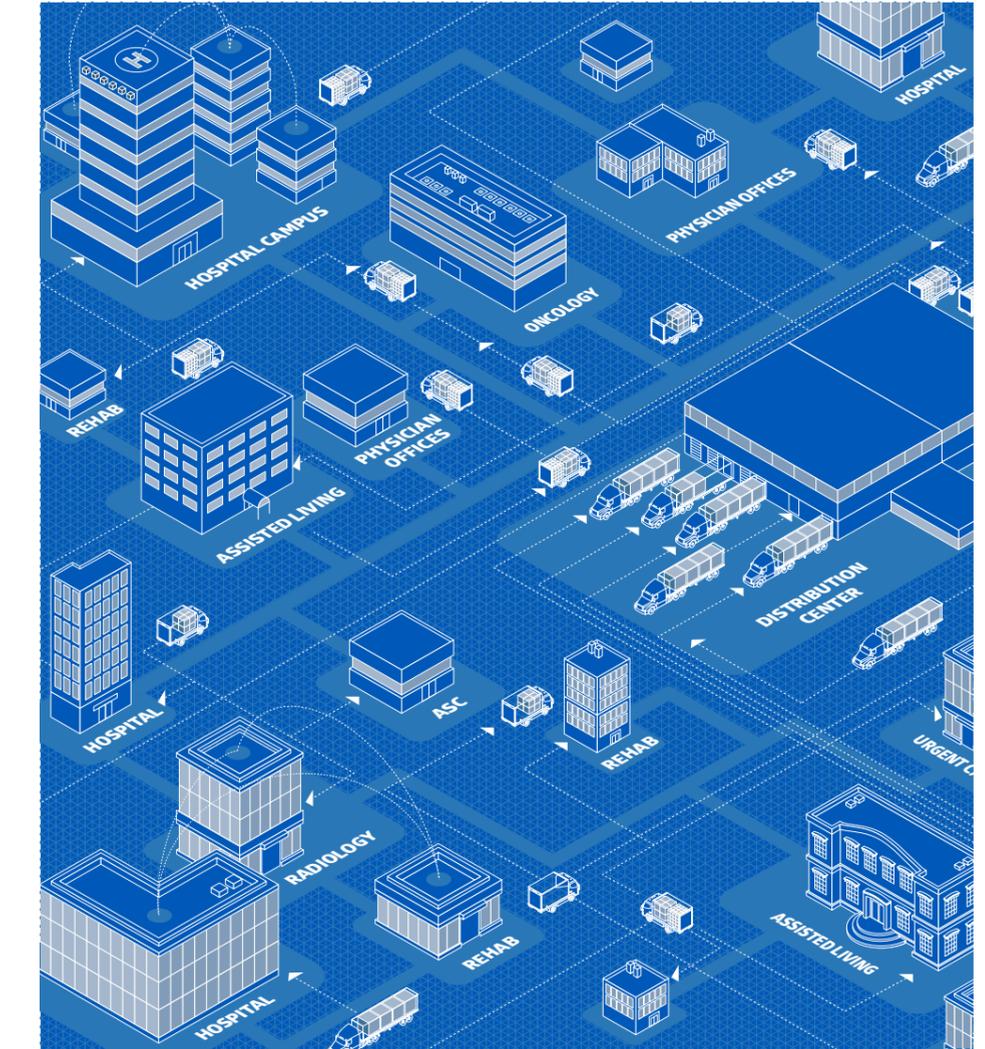

- » Our inventory experts ensure you always have the product you need.
- » We help you improve forecast accuracy, increase visibility and lower carrying cost.
- » A disaster preparedness plan guarantees your supply during times of natural disasters or pandemic.
- » Our emergency action plan includes news monitoring, seasonal forecasting, safety stock increases and customer allocation.

98.8%

Medline's 2017 service level

2.5 months

Our warehouses keep 2.5 months worth of exam glove supply on hand.

We're committed to corporate social responsibility.

Through our social and environmental initiatives, we strive to positively impact people and the planet.

Social impact

- » More than 3,000 jobs directly created or supported at our primary glove manufacturing facility
- » We conduct regular internal social compliance audits based on the SA8000 standard.
- » Local corporate responsibility programme includes education, sports and community development, plus an internal anti-bribery policy
- » We spotlight breast cancer awareness and promote early detection through our annual Pink Glove Photo Competition.

Environmental impact

- » ISO 14001 certification to assess environmental risk, measure energy savings and help reduce carbon emissions
- » Initiatives to reduce water consumption: water filtration systems for glove production lines, repairing and replacing leaking water pipes and taps, reusing water in cooling processes, water-saving audit
- » Initiatives to reduce energy consumption: energy-saving light fixtures, temperature standards, biomass energy plant, energy consumption audit
