Evaluation Program

FREE no-obligation product evaluation lets you experience the superb comfort and protection of Medline face masks and respirators for yourself. Medline provides all the tools and clinical support your staff needs during the evaluation. Contact your Medline Sales Representative for details.

Medline Business Card

Face Mask Comparison Chart

Current	Medline

FACE MASK TRIAL TODAY

Today you are trialing a new face mask. After a management evaluation, it was decided to trial the Medline face mask program. These new masks are similar to what you were currently using in terms of protection level, comfort and quality.

Since face masks are a personal and sensitive product occasionally issues that sometimes come up are listed below. These issues are temporary and will go away after a short trial period.

Sizing
Sometimes when changing face masks people feel the size/fitting chamber is different. Please be assured that these masks are made to the same standards as the masks that you are currently using with the exception of a couple specialty masks.

Small or Older
This is very common. After using your current mask for a long period of time, you get used to the smell of your mask. Our mask might smell differently at first, but just breathe through it and any smell will be dispelled.

Be assured that these face masks are constructed to meet the guidelines set forth by the Association of Operating Room Nurses (AORN). These surgical masks offer filtration ratings over 99% efficiency, plus they are cool and comfortable to wear.

If you have any questions about this product, our Medline representative _____ is here today from _____ to _____ to answer any concerns.

Please let us know what you think of these masks by filling out an evaluation form and enter it to win a drawing for a free dinner for two.

THE HIGHEST STANDARDS OF PROTECTION AND BREATHABILITY

Medline has developed many product innovations by adopting a partnership approach. This includes working with medical professionals all over the world, getting to know their unique needs and providing appropriate solutions. That's why our surgical masks and respirators offer extraordinary comfort while meeting the highest standards of protection. Plus, to help your staff intuitively select the right masks, our innovative packaging features color-coding, helpful icons, clear photography and more.

The Vital Protection Your Clinicians Deserve

All Medline surgical and procedure masks are latex-free and conform to the highest standards of barrier protection: EN14683 Type II or Type IIR.

- **Bacterial filtration efficiency (BFE)**

All Medline surgical and procedure masks have bacterial filtration efficiencies exceeding 98 percent.

- **Full selection of fluid-resistant masks and respirators**

One source for all the masks your clinicians use every day.

EUROPEAN STANDARD EN14683 MEDICAL FACE MASK REQUIREMENTS

	Bacterial Filtration Efficiency (%)	Differential Pressure (Pa/cm ²)	Splash Resistance Pressure (kPa)	Microbial Cleanliness (cfu/g)
Type I	≥ 95	< 29.4	Not required	≤ 30
Type II	≥ 98	< 29.4	Not required	≤ 30
Type IIR	≥ 98	< 49.0	≥ 16	≤ 30

EUROPEAN STANDARD EN149 RESPIRATORY MASK REQUIREMENTS

Physical Properties		Requirements EN149		
		FFP1	FFP2	FFP3
Total Inward Leakage		Not More Than 22% Avg.	Not More Than 8% Avg.	Not More Than 2% Avg.
Penetration of Filter Material, Maximum Initial Penetration of Test Aerosols	Sodium Chloride Test 95 l/min. % max	20	6	1.0
	Paraffin Oil Test 95 l/min. % max	20	6	1.0
Breathing Resistance, Maximum Permitted Resistance (mbar)	Inhalation 30 l/min	0.6	0.7	1.0
	Inhalation 95 l/min	2.1	2.4	3.0
	Exhalation 160 l/min.	3	3	3.0

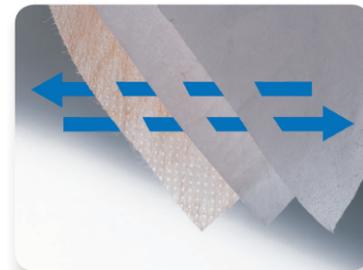

AN EXTRAORDINARY SELECTION

Providing Your Staff With Superb Comfort, Unique Innovations and Reliable Protection

At Medline, we continually work with medical professionals, learning about their unique needs and developing appropriate product solutions. The result is a comprehensive selection of latex-free masks with innovative features, offering exceptional comfort and superb protection.

COMFORT

- Wide variety – From options for sensitive skin to anti-fog eye shields and ultra-soft ties, we have something for everyone.
- Superb breathability – While filtering harmful bacteria, our masks allow for easy air flow in both directions, so the wearer stays cool and comfortable.

Bi-Directional Air Flow

INNOVATION

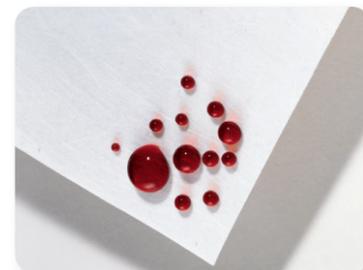

- Exclusive packaging system – Your staff will intuitively select the right masks with our unique color-coding, helpful icons, true-color photography and more.
- Antiglare eye shields – A special coating virtually eliminates glare from bright OR lighting.

Procedure Face Mask

PROTECTION

- Filtration efficiency – All Medline masks exceed the bacterial filtration efficiency and differential pressure standards set in the EN14683
- Fluid protection – alternative fluid resistant procedural and surgical masks are also available, type IIR, reaching or exceeding the standard at 120mmHg.
- Eyewear – Choose from the full range of shielded masks or separate eyewear, such as goggle or glasses styles and face shields.

Fluid resistant Facemasks

INNOVATIVE PACKAGING TO SIMPLIFY MASK SELECTION

With Medline's NEW packaging, your staff can instantly identify many important mask features:

At-a-glance icon
Reveals both the type of mask (procedure, surgical or respirator) and the manner of attachment (earloops or ties).

Color-coded packaging stands out in the sea of blue
Orange for procedure masks, green for surgical masks, purple for fluid-resistant masks, blue for respirators.

Perforations and a convenient thumb notch
For easy opening and dispensing.

PROCEDURE MASK W/ EARLOOPS FLUID-RESISTANT

GOOD FOR DROPLET PRECAUTIONS

RE: NON27410EL QTY/QTÉ: 25 SHIELD ANTI-FOG FOAM STRIP PURPLE LATEX FREE EN14683 Type IIR CE

White letter on black background
Designates the type of protection – “D” for Droplet protection or “A” for Airborne protection.

EN14683 and EN149 classification
For proper selection and peace of mind.
