

Restore™  
NITRILE GLOVES

A close-up photograph of a hand wearing a white nitrile glove. The gloved hand is gently holding a smaller, bare hand with pink nail polish. The background is a soft, out-of-focus light color.

**END YOUR GLOVE/HATE  
RELATIONSHIP.**

# **YOU CARE FOR PATIENTS. OUR GLOVES CARE FOR YOUR HANDS.**

Nurses have their hands full taking care of patients and residents all day, every day. And the necessity to use gloves creates an endless moist/dry cycle that may lead to dry, irritated skin. Restore™ Nitrile Gloves are Medline's first glove to use Colloidal Oatmeal to add comfort to the most valuable tools, the hands of your staff.

## WHAT IS COLLOIDAL OATMEAL?

Colloidal Oatmeal is simply oats that have been ground very fine to provide maximum benefit by exposing more of its valuable components. The FDA has indicated that colloidal oatmeal can temporarily protect and help relieve minor skin irritation and itching due to rashes or eczema.

Colloidal Oatmeal has a long history of beneficial use in dermatology.<sup>1</sup>

## HOW DOES IT WORK?

Restore Nitrile Gloves put a layer of colloidal oatmeal between the skin and the glove that helps maintain the skin's moisture to prevent conditions associated with dry skin. The colloidal oatmeal works while you work to help skin feel softer and smoother.

Colloidal Oatmeal helps relieve irritation and itching associated with dry skin.
