TAILORED TO IMPROVE YOUR OUTCOMES

Medline's Skin Health Solution program starts with a customised, evidence-based needs analysis developed by skin care experts. Our representatives can walk you through the analysis and identify areas for improvement specific to your organisation. This individualised approach is unique in the industry and available across the continuum of care to hospitals, hospices, nursing home facilities or long-term care facilities.

Skin Health Solution is a three pronged approach focussing on products, education and outcomes management. Medline's education emphasises the application of knowledge into clinical practice as well as the standardization of care across all healthcare settings from Acute into the Community. Products are designed to work in a complementary manner and efficiently treat skin problems that have developed. Outcomes management helps you track improvements in clinical practice and the positive effect on clinical outcomes as well as identify areas that need further effort.

Through it all, Medline's clinical experts are available if you have questions.

PRODUCTS

Skin Health Solution provides a strategic product bundle that meets patient needs from emergency and operating rooms all the way through to long-term care.

The products work together to help prevent, manage & treat any skin related problems.

EDUCATION

Medline's education curriculum offers your staff training on the basics, including risk factors, pressure redistribution and prevention of skin damage.

It also promotes teamwork and communication.

OUTCOMES

The Medline team works with you to continually evaluate the performance of the program, ensuring you are delivering optimal patient care.

REMEDY®

Barrier Cream provides a smooth, breathable film that moisturises, nourishes and protects skin.

CHG compatible

24% silicone blend
Emollient and Humectant
Botanical ingredients
Oleosome Technology

Free of fragrance,
parabens, sulfates, aloe
and phthalates

BENEFITS

- Both donates moisture (emollient) and retains moisture (humectants) already in the skin
- Contains micro particles of emollient oils and vitamins that collapse and release their contents over time
- Replacing allergenic substances reduces the risk of drying out the skin (from sulfates) and of allergic reactions (fragrances, parabens, aloe and phthalates)
- No change in protocol

INDICATIONS:

- Manage dry skin
- Formulated to help maintain conditions need for healthy skin
- Use on children over 3 years old and adults

CONTRAINDICATIONS:

- application for children over 3 years must not exceed 4 times/day

GOOD TO KNOW

- **Compatible with all continence products** as it does not affect absorbency.
- Should be applied daily as and when required.
- **Hypoallergenic, non irritating, non sensitizing & dermatologist tested.**
- Indicated **for intact or damaged skin.**
- **Breathable** therefore allowing the skin to regenerate whilst being protected.
- **Protect from freezing, avoid excessive heat.**
- If a patient is in hospital for a short stay the **sachets can be used rather than tubes** to avoid wastage.

The Science

Nature of Moisturising Barrier Cream

Item No.	Size	Packaging	Min Order Qty
MSCE092531	30ml	12/cs	12
MSCE092534	118ml	48/cs	48
MSCE092534PK	2g	144/box, 864/cs	144

Sureprep® No-Sting skin protectant forms a long-lasting, clear, coating. For use on all skin types, including neonatal skin.¹

Barrier protection

Provides a clear barrier film

Available as

- spray
- wand applicator
- wipes
- in all common presentations & sizes

Protection

Up to 72 hours protection

Water Based

Non solvent based

BENEFITS

- Patients skin can be easily inspected
- Allows the patients skin to regenerate whilst being protected
- The patients skin is protected for longer
- One solution for ALL patients
- The continence pads/products absorbancy will not be impaired
- Visible sheen aids appropriate application
- Effective & controlled application of sureprep to ensure optimum protection
- Familiar size and product presentations making it a straightforward transition over to Sureprep

CONTRAINDICATIONS: not to be used:

- on infected areas of skin
- near the eyes
- as the only covering in situations that require additional dressing protection from bacterial contamination

INDICATIONS:

To be applied to intact or damaged skin in order to provide a primary barrier against:

- bodily waste
- fluids
- adhesives

GOOD TO KNOW

- All Sureprep products with the exception of the spray are **solvent free and safe to use** even on neonates.
- It takes approximately **1 minute to dry**.
- Sureprep is indicated to provide **up to 72 hours of protection**, however this will vary between patients and depend on the level of exposure to bodily fluids & frequency of cleansing.
- Sureprep should be reapplied with each dressing change **to ensure optimum protection** as the adhesive of the dressing is likely to lift the Sureprep film.
- Barrier films **should not be used on infected skin**.
- Sureprep is indicated **for use on intact or damaged skin**.
- The full range is **listed on the Drug Tariff** and can therefore be prescribed.

MARATHON®

Marathon forms a fully flexible, clear and remarkably strong protective layer on skin.

Presented in
0.5g ampoule

Sponge tip applicator

Colour
Violet

Breathable film
Lasts for 3 days

Made of
Cyanoacrylate

Appropriate for
Intact or damaged
skin

Solvent free

BENEFITS

- Patients damaged skin is protected effectively even under the most challenging conditions
- Colouring ensures complete coverage of affected area plus appropriate application
- Confidence in appropriate application and no wastage of product
- Takes 30 seconds to dry which saves nursing time
- Patients skin will heal whilst being protected from further breakdown
- Protects patients skin for longer, saving nursing time on reapplication
- Suitable even for neonates

INDICATIONS:
Protects intact or damaged skin from:

- Moisture
- Incontinence
- Bodily fluids
- Shear and adhesive stripping

CONTRAINDICATIONS:
Do not apply directly to:

- Deep, open, bleeding, or chronic wounds
- Second or third-degree burns
- Infected areas

GOOD TO KNOW

- Marathon dries within approximately 30 seconds.
- Case studies highlighting the efficacy of Marathon even when used with the most fragile of skin with neonates are available.
- Marathon provides up to 72 hours protection depending on the amount of bodily fluids etc which are present.
- Each ampoule covers a 10x10cm area.
- Marathon should not be applied to mucous membranes.

Item No.	Size	Packaging	Min Order Qty
MSC093001	0.5ml	5ea/pck	5

ULTRASORBS®

Ultrasorbs® are unique drypads that absorb and lock away bodily moisture from the patient's skin.

GOOD TO KNOW

- Ultrasorb drypads have a **working capacity of 1,000 mL**. This is the volume of fluid the product can hold and still be dry to the touch.
- Ultrasorbs are **air-permeable** which mean the product allows airflow through the backsheet of the product. This allows it to be used on low-air-loss and therapy mattresses.
- Ultrasorbs are also available in **different sterile versions to be used as a superabsorbant for wounds, burns patients and lymphodema patients**.

INDICATIONS:

- Fluid Management absorbs body perspiration, incontinence, wound exudate, etc...
- Pressure ulcer prevention

CONTRAINDICATIONS:

- Do not use Ultrasorbs on the open wound
- Never use more than one Ultrasorb at the time as layering impedes airflow and creates pressure points

BENEFITS

- Reduces heat buildup and maintains necessary microclimate
- Leaves skin dry and healthy
- Reduces friction and shear
- Results in fewer linen changes without need to layer
